

The Ingenuity Festival Cleveland returns... and so will The ECC.

The Evolution Control Committee had a [great time performing last year](#) at **Ingenuity Festival 2008**, so when their call for artists came out for 2009's event it was a no-brainer to apply. Guess they liked us too -- we're in!

This coming weekend The ECC brings [The Wheel Of Mashup](#) and our amazing new [VidiMasher 3000](#)

to Cleveland Ohio to do

FOUR

great shows for the 2009

[Ingenuity Festival Cleveland](#)

. After appearing in the festival's

[Preview Party](#)

on Thursday July 9th, The ECC hits the street to perform on the

[All Go Signs alley stage](#)

. We'll do a fresh show for every day of the festival:

7:30-8 pm • Friday, July 10, 2009

10-10:30 pm • Saturday, July 11, 2009

5-5:30 pm • Sunday, July 12, 2009

Every show will be different with new mashups being created as audience members spin the Wheel Of Mashup. But the rest of the music changes too: one of the great things about our new VidiMasher 3000 is that it makes

improvised mashup music possible,

cutting and pasting on the fly -- anything can happen!

Last year's festival was **one of our highlights of the year.** Join us this weekend and see why!
